In order to run the site it is convenient to have all files in the same directory:
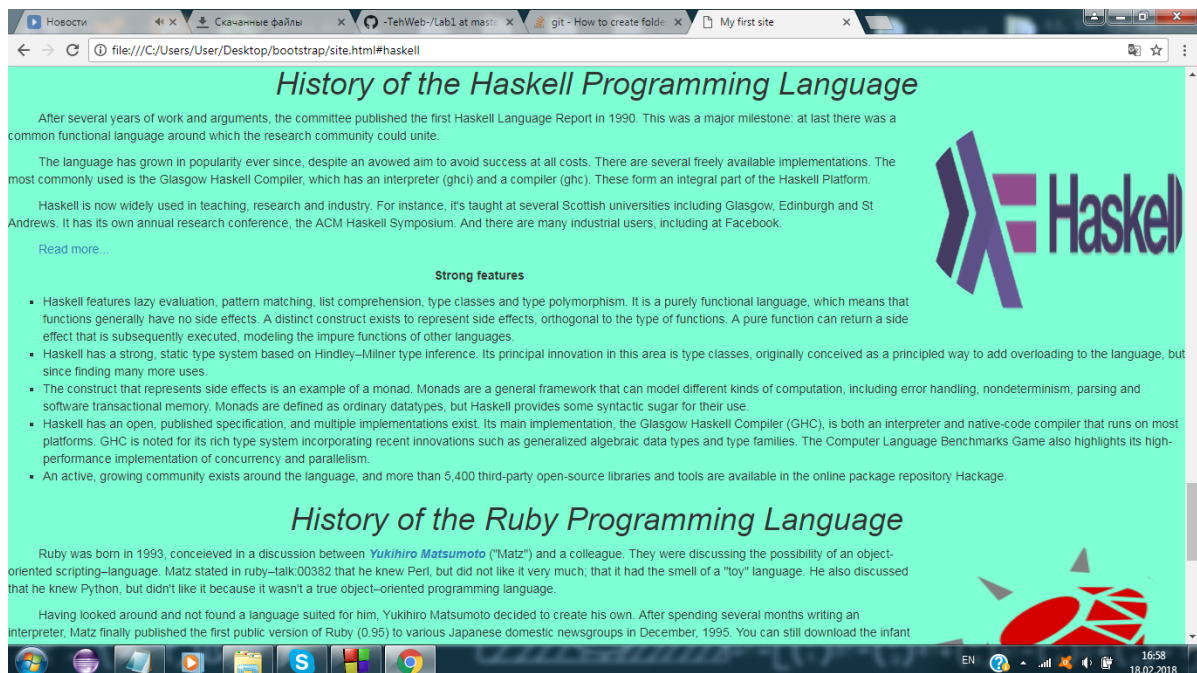

- headerscripts.css
- site.css
- site.html

Also it is important to have the connection to internet.

The files headerscripts.css and site.css use scripts and elements of bootstrap.

This site has navigation bar which will help user to go immediately to necessary information.

Also the site has a special grid. Therefore information on the page is not broken off.
